

PROMPT ENGINEERING

AbTalks · 60 Days Claude Challenge

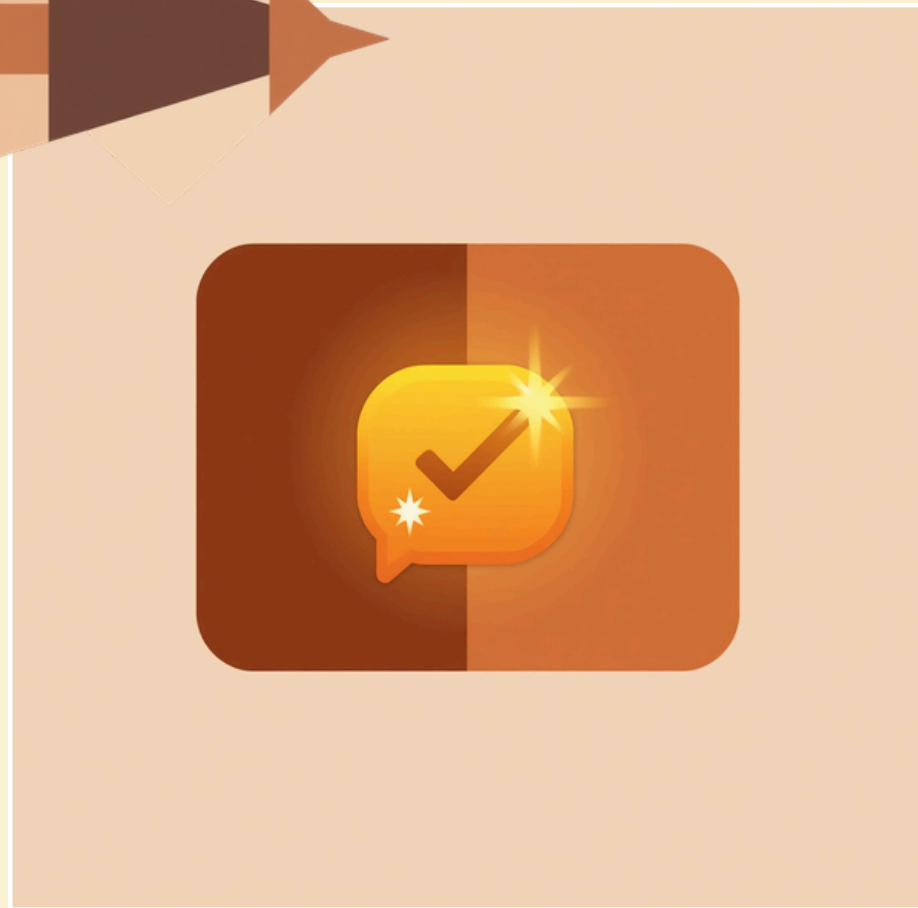

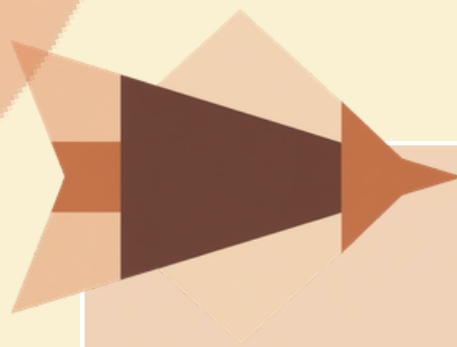

Better prompts. Better outputs. Every time.

PROMPT ENGINEERING

WEAK PROMPT

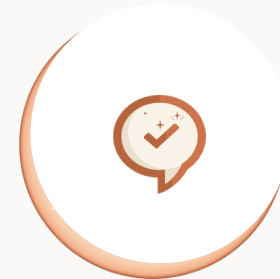

ENGINEERED PROMPT

Prompt Engineering

AbTalks · 60 Days Claude Challenge

Weak Prompt

Engineered Prompt

Vague, unstructured input with no context or role defined

01

Clear role, context, and goal specified for the AI model

No examples or format guidance provided to the model

02

Few-shot examples and output format explicitly defined

Single-turn prompt with no iteration or refinement

03

Iterative prompting with feedback loop and chain-of-thought

Ignores tone, audience, and desired response length

04

Tone, audience, and length constraints clearly specified

Results in generic, off-target, or shallow AI output

05

Produces precise, high-quality, and actionable AI output

Prompt Engineering

AbTalks · 60 Days Claude Challenge

Weak Prompt

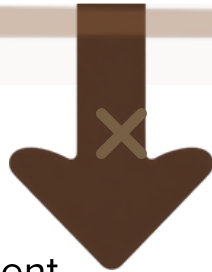

Basic Output

Vague, generic instructions with no context or structure given to the AI model

Variable Risk

Results are inconsistent, shallow, and require heavy manual editing afterward

Engineered Prompt

Better Output

Clear, structured prompts with context, role, and desired format specified

Key Difference

Precision prompting saves time and produces polished, publication-ready output
